

Discover the ultimate Zoom Room meeting experience with an Avocor touchscreen

Make collaboration even more effective by teaming Zoom meetings with touch screens from Avocor. Sized for the Enterprise market with 65, 75, and 84 inch displays. With screen sharing, white boarding and co-annotation all at the tip of your fingers, every meeting can be powerful and engaging.

Enhanced Capabilities

Enhance your Zoom Room experience with Avocor's interactive displays. Zoom Rooms automatically detects Avocor's touch capabilities, adding features such as meeting control at the panel, annotation, and white-boarding.

Fully integrated white-boarding

Enjoy real-time interactive white-boarding utilising one or more Avocor displays. Each meeting participant is automatically assigned their own colour.

Real-time screen annotation

Pick up your Avocor pen in the room and immediately begin annotating over the top of any screen sharing session for all to see, in person and remotely.

Avocor displays uniquely offer a best-in-class combination of features and performance, including:

OPS Slot to allow for an on-board PC for a fully integrated Zoom experience

InGlass touch technology, delivering unrivaled, precise annotation

4K resolution to show everything in perfect detail
