## Zoom Room Touch with Logitech and Avocor

With integrated front-of-room call controls, Zoom Rooms for Touch enables meeting room designs where all technology is wall mounted, the table space is reserved for the work and cable requirements are minimized. The combination of the Logitech MeetUp and Avocor AVF-6550 can turn any small space into an organization's collaboration and communication asset, with full feature video conferencing, screen sharing, whiteboarding, annotation and more. The Zoom Room meeting software can be run on a range of computers, including the Avocor OPS computer or small form-factor PCs like the Intel NUCs or the Lenovo ThinkCentre Tiny M920.

**DISPLAY**
