avocor™

Thank for your choosing an Avocor F series interactive display.

This Quick Start Guide includes easy step by step instructions for you to follow to successfully set up the embedded PC running Windows 10 OS on your new interactive touch screen. It is important that you follow these instructions and don't deviate from them.

Windows 10 Installer Guide

Remove the display from the box and take special care when lifting the display from the box. It is advisable that 2 people do this for smaller displays, while larger 75" and 84" displays have 3-4 people.

Attach the supplied power cord to the back of the display and into an active wall outlet. Turn on the power switch until the LED indicator on the front of the display lights up green. If it doesn't, check all connections and ensure that your power outlet is active. Please also use remote control to fully turn on the display.

Do NOT unplug or turn off the display and wait up to 20 seconds and you will see Windows logo.

You will see a number of prompts on the screen be sure to follow these instructions.
Select the relevant language. E.g. English.

Once selected the next screen will ask the following.
What is your Home Country/Region? E.g. United Kingdom.
What's your preferred app language? E.g. English (United Kingdom).
What keyboard layout would you like to use? E.g. United Kingdom.
What time zone are you in? E.g. (UTC) Dublin, Edinburgh, Lisbon, London.
Once you have made your selections please select **NEXT.**

The next screen that you will see is the Microsoft Software Licence Terms. **Please read and select accept.**

You will be then be asked to select a network. **Please do NOT connect and skip this step**. This is to stop any installation delays due to windows updates etc. The administrator can change/select the Wi-Fi connection once installation is completed.

The next screen you will see is **Get Going Fast**.

Select **Use Express Settings** – The administrator settings can be changed once installation has been completed.

You will then see **"Restarting in a Moment" Do NOT unplug or turn off the display.**

The next screen you will see is the **Create an account for this PC**

Follow the instructions and please ensure that this information is passed to the administrator. Please see example user name. This will be the default setting for the display until changed by the administrator. Please see example.

Username – admin

Now the PC will create the temporary user account and you will be presented with the Desktop.

For optimal use the Avocor F6510, F7510 & F8410 embedded Windows 10 PC is optimised to run in 1080p to do this please follow these steps:

Touch the display and press down gently on the Microsoft Windows desktop and in a moment a list of options will be given select **Graphics Properties**.

Next select **Display** and you will see **Resolution** you will need to select **1920 x 1080** in the drop down menu.

Below that you will see **Refresh Rate**, please select **60 Hz** in the drop down menu.

When finished please select **Apply** at the bottom of the page and close **Graphics Properties**.

Touch the display and press down gently on the Microsoft Windows desktop and in a moment a list of options will be given. Select **Display Settings** and you will then need to adjust the size of the text, apps and other items.

Once changed, you will see some apps won't respond to scaling changes until you sign out to the left of this you will see **Sign Out Now**. Do this and the device will restart and will save the new settings.

You are now ready handover to the administrator. They would need to set up an account for the display. For assistance please go to **www.microsoft.com**

Depending on your organisation you can upgrade to Microsoft Windows Professional, please see your End User Licensing Agreement.

Adjusting Your Display

Auto-Adjust
The display will automatically adjust to the incoming signal. If you find it necessary to adjust the image, press the Auto button on the remote control to access the auto-adjust feature.

Trouble Shooting Tips

If you experience image fuzziness, flicker, or if you are not getting a signal on your display after following the Quick Start Guide. Please contact Avocor Technical Support for additional assistance. We provide technical warranty support Monday to Friday from 09:00 to 17:30.
