## Windows collaboration display by Avocor

The ease of connecting a laptop to the display with touch connectivity, microphone and speakers as well as delivering power and internet via the single-cable USB-C is one of the reasons Windows collaboration displays by Avocor are changing how teams work together. By redefining the ease of BYOD, this solution demonstrated with Lenovo's Yoga ThinkPad finally delivers on the promise that meetings can take seconds to start. Prefer a dedicated PC to run applications, such as Quicklaunch or Microsoft teams? The Lenovo ThinkStation P330 Tiny easily mounts to the back of the Windows collaboration display by Avocor to provide powerful all-in-one collaboration, videoconferencing and computing.
