E series interactive displays by

AVOCOR

Crestron DM-NVX-D80-IoAV endpoint network decoder + Avocor E series display

Crestron DM-NVX-D80 network AV decoder is an all-new solution that instantly transforms Avocor displays into a DM NVX™ endpoint, delivering audio and video across existing 1Gb networks. With all-new Pixel Perfect Processing technology, DM NVX is the only network AV solution that delivers a flawless image every time. The DM NVX decoder plugs into the OPS port and is powered by the Avocor display, eliminating the need for messy cables and cumbersome power supplies.

Developed in conjunction with the IoAV Alliance, the D80 provides a seamlessly integrated network AV solution. Now, Avocor displays are natively DM NVX ready and the DM-NVX-D80 greatly simplifies installation and eliminates programming. With its ability to integrate with Crestron XiO Cloud™, DM-NVX-D80 allows system managers to infinitely control each display from one centralized location.
