

# ADDING INTERACTIVITY TO MICROSOFT TEAMS WITH AVOCOR

As organizations face the challenges of bringing remote teams together, Microsoft Teams has emerged as leading platform for collaboration and productivity with more than 75 million users and growing worldwide. Microsoft Teams offers a streamlined communication interface to accelerate collaboration for teams efficiently and delivers the integration of Microsoft 365 applications in a secure environment.

Adding an Avocor interactive display as a meeting room or home office endpoint enhances Teams meetings because it enables all the functionality of a meeting room in a digital format, making content, annotations and edits easy to see and share, no matter where your team is located. Delivering superior touch technology, your Avocor display can easily integrate with calendars, enables touch-to-join, instant content sharing, always-on readiness and now interactive whiteboard within Microsoft Teams.

And to create a Microsoft Teams Room (MTR), Avocor offers the world's first and only display to be certified for Microsoft Teams. Bringing a new dynamic to your Teams meeting room experience allowing in-room users to collaborate real-time using tools, such as Microsoft Whiteboard, the AVW-6555 WCD provides every team member an immersive experience that is the closest to everyone being in the same meeting room.

With certified Teams hardware from Logitech, Lenovo, Poly and HP, pairing with an Avocor AVW-6555 to create an MTR, which enables team members to quickly and easily join Microsoft Teams meetings, make calls and seamlessly share content all from an intuitive touch screen console device sharing to a large format display.

## AVW-6555 Capabilities

## Key MTR Solutions

Logitech Tap Base Model

logitech

Lenovo Hub 500

USB (Audio, Camera, Touch)  
HDMI/DP (Video Output)

Ideal for the focus room, the Avocor WCD features Type-C connectivity, enabling teammates to simply connect their laptop with a single cable to not only drive the content, audio and camera but also deliver Ethernet and power to the laptop, eliminating the common frustrations around trying to connect to the right source, allowing for seamless BYOD and BYOM.

## AVW-6555 Capabilities

## End User Laptop

Microsoft 365

3rd party productivity /workflow

3rd party video conferencing

USB-C (Audio, Camera, Touch, Network, Power)  
-OR-  
USB (Audio, Camera, Touch, Network)  
HDMI/DP (Video Output)
