

ADDING INTERACTIVITY TO ZOOM ROOMS WITH AVOCOR

Make collaboration even more effective in meeting rooms, schools, and home offices by teaming Zoom with interactive displays from Avocor.

Zoom usage has exploded in the last 12 months, with more than 300M Zoom daily active users. Avocor has a range of Zoom Room options to meet any room configuration, each designed to enable users to book and start meetings quickly, share content easily and add whiteboarding and annotation to existing Zoom Rooms.

A Zoom Room is a hardware set-up that enables users connect with remote teammates and hold virtual meetings, integrated seamlessly with cameras, microphones, speakers and displays to create an immersive experience that feels like you're all in the same room together.

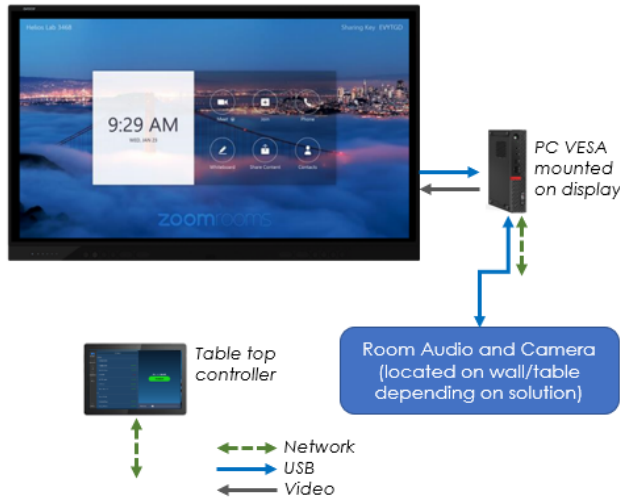

Zoom Rooms supports multi-touch between Windows based controllers and Avocor interactive touch displays using controller devices such as Logitech Tap, Lenovo Hub, and HP Slice.

Avocor options for Zoom Room configuration

All-in-one Zoom Room for Touch (ALZ series)

- Pre-configured for Zoom with all-in-one design
- Best-of-breed combination of Avocor interactive display and Logitech MeetUp audio and camera
- Available in 55", 65", 75", 86" options*
- Zoom-ready Intel OPS onboard

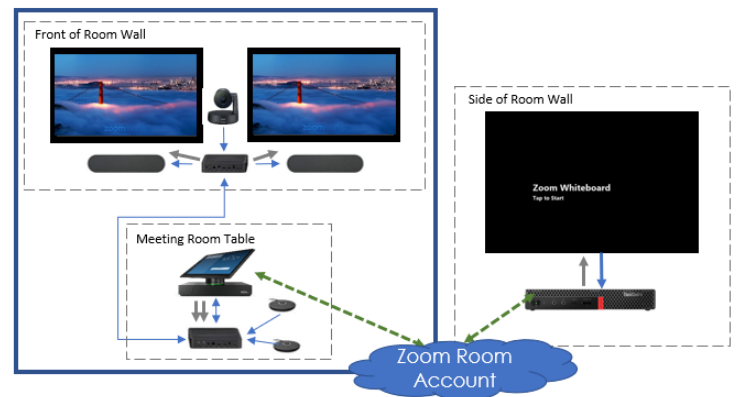

Traditional Zoom Room for Touch

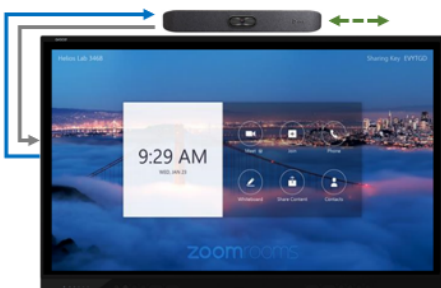

- Add Avocor to PC Zoom kits to activate Zoom Room for Touch capabilities
- Provides in-meeting whiteboarding, annotation, 2nd set of meeting room controls
- Choose the Avocor display to suit your meeting space:
- E series is affordable with interactive technology well suited to Zoom
- F series delivers high-performance InGlass where non-Zoom applications may be considered in the future

Zoom Companion Whiteboard

- The easiest way to integrate Zoom whiteboarding and annotation to rooms with dedicated static videoconferencing displays
- Choose Avocor E or F series displays and add 3rd-party Zoom-certified audio and camera hardware, such as Lenovo, for Zoom meetings
- A great way to upgrade existent rooms to Zoom ready with minimal spend and no reconfiguration needed

Front of Room Wall – example with Poly Studio X30

Meeting Room Table – example with Poly TC8

Zoom Appliance

- Pair Avocor with Zoom set-top appliances from partners such as Poly to create front of room and table UIs
- Choose an appliance with audio/camera capabilities suited to your meeting room or office
- Choose the Avocor interactive display to accompany the Zoom appliance
- Pair Avocor with Zoom set-top-appliances to create an all-in-one Zoom Room for Touch experience
