

Why interactivity in Courtroom and Legal environments?

Interactive displays support the presentation of digital evidence documents from an on-board PC, laptop, tablet or mobile device while providing the presenter the enhanced ability to zoom images or use annotation tools to highlight the evidence more clearly. Interactive displays also provide a more flexible design and platform for video conferencing with a blended in-person and remote group of participants with the added benefit of utilizing the embedded annotation tools for a more impactful visual delivery of the content.

Reasons to replace a projector, whiteboard, or conventional blackboard with an interactive display:

- Connect any PC or tablet device straight to the display, enabling easy presentation as well as ink capability over a range of applications.
- Instantly update documents during a meeting or court proceeding.
- Connect one or more interactive displays in the room to present critical data to one or more groups.
- Enables deeper communication engagement for remoteparticipation via VC platforms.
- Adding in a mobile cart allows for flexibility, sharing displays between rooms or in view of participants.
- Lower cost of install than projectors.

Interactive displays offer a multi-functional solution that is easily adaptable to the ever-changing requirements within the legal sector, meaning your investment is futureproofed and continues to deliver.

Why Avocor?

- Display sizes ranging from 55" to 105" for every type of space.
- Completely secure, ensuring that your data is always protected. Customizable settings, delivering secure integration across your network.
- Seamless integration with leading collaboration platforms including Microsoft Teams, Zoom, Google Meet and RingCentral.
- Range of hardware options available, including all-in-one displays and Avocor CollabTouch Display Solutions for interactive video collaboration featuring Logitech Rally Bar and Rally Bar Mini.
- Incredibly intuitive user interface via Avocor UiQ and Avocor GroupShare software solutions.
- Avocor Fuse included free-of-charge, Avocor's management software that enables users to update and monitor displays remotely from one central location.
- Best-in-class 3-year advanced replacement warranty and extended 5-year warranties available.
- Simple to install and designed to intergate with most audio and video solutions with no special cables or platform limitations.
- TAA compliant models available.*

"The pandemic forced us to look at new ways of doing things when we couldn't be in the same room together. We knew that we needed a way to facilitate court hearings virtually through Zoom, and we were delighted when we were introduced to Avocor displays. Our displays are easy to use and provide an excellent platform for us to hold Zoom hearings as well as internal meetings with remote staff quickly and efficiently."
