Why interactivity in Pharmaceutical environments?

Agile working is redefining the Pharmaceutical industry, helping brands overcome barriers and harness success through speed to market, digitization and customer focus, often by improving the working dynamics between crossfunctional teams.

Interactive displays help to:

- Accelerate agile working environments.

- Create digital workspaces that enable teams to collaborate together in real time.

- Assist with speeding up business efficiency and productive outcomes.

- Help to transform R&D functions and unlocking competitive advantage in an intensive market.

Reasons to choose Avocor for Pharmaceutical settings

- Display sizes ranging from 27" to 105" for every type of space.

- Completely secure, ensuring that your data is always protected. Customizable settings, delivering secure integration across your network.

- Seamless integration with leading collaboration platforms including Microsoft Teams, Zoom, Google Meet and RingCentral.

- Range of hardware options available, including all-in-one displays and Avocor CollabTouch Display Solutions for interactive video collaboration featuring Logitech Rally Bar and Rally Bar Mini.

- Incredibly intuitive user interface via Avocor UiQ and Avocor GroupShare software solutions.

- Avocor FUSE included free-of-charge, Avocor's management software that enables users to update and monitor displays remotely from one central location.

- Best-in-class 3-year advanced replacement warranty and extended 5-year warranties available.

- Simple to install and designed to intergate with most audio and video solutions with no special cables or platform limitations.
