

Built To Work The Way You Do

Launcher gives you freedom without compromise. It removes the restrictions of vendor-locked systems, while keeping your spaces secure and your users confident.

With support for multiple VC platforms, custom layouts, and central management, Launcher adapts to how you work, not the other way around.

Why use Launcher

- ✔

Multi-Platform Support
Join meetings across Zoom, Teams, Meet, Webex and more, all from one consistent interface.
- ✔

Secure by Design
Kiosk mode and Custom Cleanup protect user data and lock down the device between sessions.
- ✔

All You Apps, One Screen
Add shortcuts to the tools your users already rely on, giving one-touch secure access to all.
- ✔

Editable Home Screen
Long press your display to drag, drop, and resize widget tiles to tailor the layout to your space and user needs.
- ✔

Screensaver Messaging
Display internal messages, branding, or room guidance when Launcher is idle, no extra signage software required.
- ✔

Central Management
Configure, monitor, and update all rooms remotely from a secure online management portal.
- ✔

Scoped Admin Access
Assign owner, admin, or operator roles to manage rooms by region, floor, or function, with no overlap or confusion.
- ✔

Personal calls and files
Scan a QR code to access personal meetings and files via the display. Everything's even wiped when you disconnect, keeping privacy intact.

System	
Minimum hardware specifications	Intel Core i3 (8th Gen) processor, 8GB RAM, 64GB storage space
Operating system	Windows 10 v1809 (10.0 build 17134) or later
Languages	English, Spanish, French, German, Italian, Chinese Traditional
Display Resolution	
4K	3840×2160 with scaling set to 150%, 200% and 300%
2K	2560×1440 with scaling set to 100%, 150% and 200%
Full HD	1920×1080 with scaling set to 100% and 150%
Network	
Ports	TCP ports 80, 443 and 5671 need to be open
Bandwidth	2 Mbs or greater When using video conferencing apps, greater bandwidth is required IT admins should refer to the recommended guidelines for each platform
Mobile App	
iOS	12.1 or greater
Android	4.4 or greater
